You would have to get a step-up transformer (perhaps auto-wound for lower costs) to get 220 from a 110 inverter. Re: 220v from two inverters? Aloha, Can I parallel two of the same MSW inverters @110v each and get 220v single phase? If so, then would I tie the two neutrals together? Reference my system below. thanks

Forse, sfruttando la capacità di sovraccarico dell'inverter, e considerando che verrà azionato per tempi brevi, potrebbe andare lo stesso. Gli inverter commerciali non generano 380 V trifase ...

Hm. So single phase inverter, powering both legs on the same phase, plus the neutral. At that point, I don't think the issue would be panel overload, but rather inverter overwork. Now in that case I'd need 1 inverter capable of 6000w or so. Still might be worth in, economically, as those are still several hundred less than a split-phase inverter.
