This 3V vertical submersible low power/noise water pump is an ideal solution for creating small indoor water features or as part of a plant watering system. At the heart of the pump is a brushless 3V DC motor that runs quietly and only draws approx. 100mA so it can be controlled with a simple switch or microcontroller.

This DC operated mini submersible water pump is ideal for small vending machines and other applications, in which a small amount of water has to be pumped. The operating voltage for this DC pump is between 3 to 9V and can be easily controlled with development boards like Arduino, Raspberry Pi, ESP, and other microcon

This is Micro Submersible Water Pump DC 3V-5V, which can be easily integrated into your water system project. The water pump works using the water suction method which drains the water through its inlet and released it through the ...

The Sunsbell Solar Water Pump is ideal for a garden patio or pond. It comes in with a 3 m long cable and 4 different nozzle heads. It's very easy to use- just immerse the pump under water, place the panel under full sunlight ...

This small water pump is extremely easy to use. Dip it into the water or liquid you want to pump, plug the drain hose and connect it to the power supply. It works at 3V to 6V voltage and is capable of expelling 120L per hour. Great to serve as a small water pump! o Voltage: 3V - 6V o Max. liquid ejecting height: 40-110cm o Flow speed ...

The Horizontal Mini Submersible Pump is designed to operate on DC voltage, ranging from 3V to 5V. This pump is an excellent choice for hobbyists and students seeking to create water solutions for various projects. Specification: o DC Voltage: 3V-5V o Working Current: 130-220mA o Maximum Lift: 40-110cm o Flow Rate: 100L/H o Outside ...

A DC water pump is a small electric water pump motor that can be supplied by a 24v, 12v, 5v, 6v batteries, solar panels, or other DC power supplies. It utilizes centrifugal force to move, pressurize, or circulate water and other liquids. Unlike AC water pumps, which are powered by higher voltage AC motors (120V, 220V, 240V, 380V), DC water pumps offer several ...
