

Could a Floating photovoltaic plant and a wind park work in Albania?

State-owned utility KESH added a ground-mounted solar power unit to one of its main hydroelectric stations, but the idea is to integrate a floating photovoltaic plant and a wind park as well. It is an opportunity to create a globally unique model for combining renewable energy technologies. Albania has a specific electricity production system.

How can Albania achieve a smart energy infrastructure?

Creation of a smart energy infrastructure: Supporting solar and wind energy source projects to diversify the renewable energy portfolio, harnessing Albania's ample sunlight and wind resources for clean power generation.

How many solar projects are there in Albania?

So far, the solar auctions have produced two PV projects with a total of 240 MW. Albania reports 7 GW of wind and solar potential and is looking into developing offshore wind in the Adriatic Sea. The availability of renewable energy resources in Albania for some renewable energy technologies is less studied than for others.

What is the energy policy of Albania?

Energy Policy of Albania includes the promotion for the use of renewable energy sources beyond hydropower due to the significant potential our country has for photovoltaic and wind energy production, and its favorable geographical position, climate conditions and high intensity of the solar radiation for the use of solar energy.

Does Albania need a diversified energy production mix?

The government of Albania seems to have already acknowledged the need for a diversified energy production mix. The Minister of Energy and Infrastructure, Belinda Balluku, has repeatedly highlighted that one of the key pillars of focus is the national strategy on energy diversification.

Will Albania move from hydroelectric power to solar?

In a video message, the ministers talked about Albania's move from hydroelectric power to a mix of solar and wind energy. Balluku explained that this shift is part of Albania's long-term plan for a sustainable future.

will be chosen by Albanian authorities (green certificates) needs to be developed such that certificates generated in the Albania national market can be sold and traded with the other European countries, especially given the new Italian wind-farm deal. Currently only hydropower makes a significant contribution to the current energy consumption

Albania has launched multiple projects to build new internal grid connections aimed at accommodating more renewable energy sources, the CEO of the TSO Ost, Skerdi Drenova, told Montel last week in a written interview.
