What are mitrex solar roof tiles?

Mitrex solar roof tiles are a BIPV technology designed to appear as typical asphalt shingles on residential roofs. They serve the dual purpose of protecting the roof structure while using solar energy to generate electricity. Moreover, they are easy to install and, like ordinary shingles, are built to withstand the weather elements.

What types of solar tiles are available?

Mitrex solar tile varieties include solar roof shingles, solar laminates, modules with integrated PV cells, and transparent laminates. These technologies are generally produced using crystalline or with thin-film solar cells. For more information, consult the table below or contact a member of our solar team.
