How can reusable packaging help solar and electrical companies?

We help solar and electrical companies reduce waste, streamline operations, and save money through reusable packaging solutions. From robust reusable packaging options like collapsible bulk bin containers and solar panel pallets to custom packaging, we believe in win/win solutions that are better for people and the planet.

What are reusable solar panels?

Reusable Solar Panel Pallets: Designed to protect solar modules during transit and optimize storage. **Bulk Bin Containers:** Stackable and collapsible options for transporting and storing BOS components, electrical equipment, and power tools.

What is a solarfold photovoltaic container?

The Solarfold photovoltaic container can be used anywhere and is characterized by its flexible and lightweight substructure. The semi-automatic electric drive brings the mobile photovoltaic system over a length of almost 130 meters quickly and without effort into operation in a very short time.

How does solarfold work?

With Solarfold, you produce energy where it is needed and where it pays off. The innovative and mobile solar container contains 200 photovoltaic modules with a maximum nominal output of 134 kWp and, thanks to the lightweight and environmentally friendly aluminum rail system, enables rapid and mobile operation.

How many homes can a solarfold Container Supply?

The on-grid version of the solarfold container is connected directly to the public power grid and can supply up to 40 single-family homes with the energy produced (energy requirement of 3,500 kW/year/single-family house). The solarfold on-grid container can also be expanded with various storage solutions.

Folding photovoltaic panel containers can be deployed in a short time, eliminating the need for complex power line laying projects. Secondly, the container is compact in design and easy to transport, and can be transported to remote areas by truck, ship or even helicopter.
