Battery Type and Flexibility in Design. Rather than focusing solely on battery chemistry, we prioritise the requirements of the application. Our designs adapt to your needs, whether for long-term power delivery, compact form factors, or custom safety features. Design Considerations: Power Density: Balancing energy needs with size constraints.

In theory, a 100kWh battery system can complete 3 charge-discharge cycles per day, providing 3 opportunities for profit each day. Actual results will depend on the charging power and local electricity pricing rules. Protection Against Power Outages: Power outages in modern society can result in the loss of all power supply.
