Why should you choose gensets equipped with uninterruptible power supplies (UPS)?

We offer integrated and customised systems that meet your electricity needs, thanks in particular to gensets equipped with Uninterruptible Power Supplies (UPS). Our dynamic high-performance UPS systems meet the demand for a continuous, stable and high-quality power supply, capable of correcting all your power supply failures immediately.

Does eneria offer an uninterruptible power supply?

Thanks to our UPS offer, Eneria can guarantee an uninterruptible power supply for data center, in the field of healthcare, banking and insurance, telecommunications, industry or events. We offer integrated and customised systems that meet your electricity needs, thanks in particular to gensets equipped with Uninterruptible Power Supplies (UPS).

**Wide Input Frequency Range:** Operates with an input frequency range of 47-440 Hz, ensuring compatibility with various power sources, making it ideal for military UPS applications and UPS systems for harsh environments. **High Power Density:** Provides 3 kilowatts in a compact 2U rack form factor with a hot-swap battery drawer for uninterrupted power ...

The online UPS is the highest of the technically most advanced of the power supply product line in that it always has a backup power source in the power flow path, thus requiring no transfer time from the utility power supply during power failure to the backup sources. Compactness, cost, reliability of operation and efficiency are the most dominating factors influencing the research ...

This paper presents a new UPS topology, the active UPS (AUPS). The AUPS uses two high frequency cycloconverter circuits connected by a high frequency AC link. A full bridge inverter maintains the high frequency AC link power. One cycloconverter is connected in series with the mains, acting as a high impedance sinusoidal current source, and the other is connected in ...
