Why do we need solar panels in South Africa?

Solar panels are fast becoming one of South Africa's most necessary requirements, due to the fact that this country has one of the most unstable and unreliable power grids in the world. The constant threat of power outages is more than an inconvenience factor, but continual outages can seriously damage our electrical and electronic equipment.

Why should a company move to on-site power generation from a solar system?

By moving to on-site power generation from a solar system, the company can lower its operational costs over the next decades. Offices and businesses can utilise solar panels and solar thermal panels for a variety of things, including pre-heating ventilation air, water heating, solar cooling, lighting, and power.
