What is a green cell power inverter?

Our Green Cell power inverters are devices, that alter the current 12V DC from a car socket to 230V. Using this solution, you can use any device while on the road, wherever you go. This specific model is intended to be installed on current 12V. The device delivers power in form of a pure sine wave, which enables the use of ANY kind of device.

What is the output frequency of a car power inverter?

(When the battery voltage is lower than 10.5V, the inverter is low voltage protection, when the battery voltage is higher than 15V, the inverter high voltage protection) Output frequency is: 50Hz for 220V model / 60Hz for 110V model. [Car Power inverter] Car power inverter with 2 USB ports and one AC outlet.

How much power does a car power inverter have?

[Car Power inverter] Car power inverter with 2 USB ports and one AC outlet. The power inverter comes with free cigarettes lighter and 2 pcs battery clips, providing 300Watt continuous power, 4000watt peak power (Please make sure that the total rated power of the connected devices is $\leq 300W$).

What is a smart LCD display?

[Intelligent LCD Voltage Screen display] Colorful smart LCD Display shows the battery Input battery voltage, output voltage, Battery capacity, frequency 50Hz or 60Hz, load capacity in real-time, which can help you to know the state of inverter conveniently.

How does a 230V inverter work?

The inverter generates a full (otherwise pure) sinusoidal output current. This means that the current is the same as that in a 230 V "socket"; at home, so it can be used safely with any electrical equipment. You use it without any problems, just as you always have.

How reliable is an inverter?

The inverter is characterized by reliability, even when operating for several hours a day. Advanced technologies employed within, including both active and passive cooling, make it a stable power source. It will perform perfectly in high temperatures during exotic travels.
