Bel continually strengthens the organization through the broad collection of backgrounds, cultures, skillsets, and perspectives of our associates.

What has the EPC done for Samoa?

The EPC has connected up to 99% of Samoa's population to its electricity supply. As mandated to generate, distribute and sell electricity to all of Samoa, the EPC has increased access to quality and affordable electricity supply. To date, works continue for further developments of its existing generation and distribution network.

What are the different types of power supplies?

At a broad level, power supplies are categorized into two types: linear and switching. Linear power supplies handle input power directly, keeping all active conversion components within their linear operating regions. For instance, a frequency to voltage converter employs an operational amplifier to manage linear signals.
