What is the best portable power bank?

ZDNET saves you time and money by delivering the best products and tech deals to your inbox every week. We've tested the best portable power banks, which are MagSafe, portable, rugged, and more, to keep your devices powered up. Here are our recommendations.

What features should you consider when buying a portable power bank?

Pass-through charging is another feature to consider; with it, you can charge your device and a portable power bank simultaneously. That's convenient if both your phone and backup battery are running on empty.

What is a qi2 power bank?

The latest entry in Anker's MagGo range is the first Qi2 power bank we've tested. The Qi2 wireless charging standard borrows elements of Apple's MagSafe, enabling supported phones to connect with perfect alignment using a ring of magnets.

How do power banks compare?

We also compare power banks based on their power-to-weight ratio, which tells us how much battery life you get for the extra weight you're forced to carry. We've got power banks for power users that give you detailed information about the devices you're charging, or simple magnetic power banks that smile while your iPhone charges.

Is cuktech P-series a good power bank?

Everything about the P-series power bank feels premium and stylish, from the packaging to the design. There's even a futuristic pulsing blue light on the front while the power bank is in use that looks very sci-fi. Review: Cuktech P-series 25,000mAh I must admit that my inner geek loves the TFT display on this power bank.

Can a power bank charge a laptop?

Power banks are most commonly intended to charge mobile devices such as cellphones, tablets, cameras, and portable speakers. They can also be used to charge laptops provided the ports allow for it and the power charging rate is compatible. Power banks are generally not suited to charging larger electronic devices in your home.

Some Samsung phones can fast-charge at 45W and iPhones around 30W. Don't worry if the power bank can handle even higher (say, 100W) as the phone will only take in what it can--so higher is as safe as lower, just faster. Ports: a power bank with more than one port can charge multiple devices at the same time. Make sure it has the right ports ...
