data center can be disastrous. So great care is taken to make sure that the very best back-up power scheme is in place. A reliable and efficient uninterruptible power supply (UPS) is a mainstay of such as scheme.

The UPS system has its own internal power source. The output sockets or output terminals of the UPS system can be energized even if the UPS system is not connected to the building cabling. To switch off the UPS system completely, first press the OFF/Enter button to disconnect the mains. Caution - Risk of electric shock.
