

Cyprus outdoor power supply production factory

Does Cyprus use natural gas?

Cyprus does not currently use natural gas. Once the Cyprus LNG Import terminal is in operation, a large part of the island's thermal power generation

What is the electricity transmission system operator of Cyprus doing?

fully implemented, and more specifically: The legislation making the Electricity Transmission System Operator of Cyprus an independent authority (which will facilitate the full deployment of the electricity market and the increased deployment of renewables in electricity),

Is diversification of energy supply a good idea for Cyprus?

As explained in Section 3.1.3, in the absence of natural gas supplies and hydrogen infrastructure, diversification of energy supply for Cyprus is equivalent to accelerating the use of renewable energy, and the relevant gaps have been addressed in the previous paragraphs.

Is the Cyprus Energy Regulatory Authority compliant with REPowerEU?

It is fully compliant with the REPowerEU objectives of reducing fossil fuel imports and diversifying energy supply.²¹ See Table 1.1.1. The Cyprus Energy Regulatory Authority is the legally competent authority for this reform and will need, in cooperation with

Why is REPowerEU not relevant for Cyprus?

Energy mobility, and energy interconnections. The two other main areas of REPowerEU - diversifying energy supply and reduction of fossil fuel use in industry - are less pertinent for Cyprus for the reasons explained below, hence the relevant investments and reforms are included under the other

Does Cyprus use fossil fuels in its energy system?

Cyprus does not use solid fossil fuels in its energy system apart from small amounts of coal used by the local cement factory that consumed 157.6 GWh in 2020¹, all of which was imported from Russia¹². This import will have to cease, or the plant must switch suppliers, in view of the ban

developed in the coming years. On the other hand, the costs of renewable power supply options have fallen dramatically. Meanwhile, concerns about greenhouse gases and local pollutants have increased, reflecting stringent European Union regulations. Renewable energy offers a way for Cyprus to reduce both the cost and the
