

Democratic Republic of Congo 70 billion energy storage project

How does the Democratic Republic of the Congo support the economy?

In the AC, Democratic Republic of the Congo supports an economy six-times larger than today's with only 35% more energy by diversifying its energy mix away from one that is 95% dependent on bioenergy.

Could the Congo become an electricity exporter?

Almost all electricity generation today comes from hydropower and the Inga project has the potential to provide much more. If network constraints are addressed, Democratic Republic of the Congo could become an electricity exporter.

Why is the Democratic Republic of Congo a good place to live?

Context The Democratic Republic of Congo (DRC) is among the five poorest nations in the world, yet is endowed with exceptional natural resources, including minerals, hydropower potential, significant arable land, immense biodiversity, and the world's second-largest rainforest.

What does 3% energy transfer mean for DRC?

3% ENERGY TRANSITION IN ACTION Grand Inga hydropower project The DRC has vast solar, wind and hydropower potential, and the government committed to increasing the share of renewable energy in the national energy mix as part of its nationally determined contributions (NDCs) under the Paris Agreement. In 2013, the government announced plans to deve

Why is Congo a major producer of cobalt?

Further industrial development depends on a large increase in imports. Democratic Republic of the Congo is a major producer of minerals. It accounts for almost two-thirds of global cobalt production; this gives it a crucial role in global clean energy transitions.

How will DRC's economic development support work?

The support will likely be phased, with early phases focusing on local development opportunities, institutional strengthening, establishing the foundations for broader economic growth, and the range of technical studies that will be required for further decision making by the government of DRC.
