For me, though all four 1000 watt pure sine wave inverters above are decent picks, I have to go with either the AIM POWER 1000 watt inverter or the GO POWER 1000 watt sine wave inverter. The AIM and GO POWER has US based support and it may make things easier if anything goes off the rails, so to speak.

While an inverter can produce different waveforms, a pure sine wave output is preferable because many electrical products are designed to work best with a sine wave AC power source. A high-quality and well-designed inverter ensures that the output is purely in the form of a sine wave with minimal conversion losses in the system components.
