An on-grid solar system, also known as a grid-tied system, is a photovoltaic (PV) solar power system that's connected to the utility grid. This means: The electricity generated by your solar panels can power your home or business. Any excess electricity can be exported back to the grid. Benefits of On-Grid Solar Systems. Reduced electricity bills

The photovoltaic grid-connected power generation system can be directly connected to the household power grid, convert sunlight into electricity through solar panels for household use, and supply excess electricity back to the grid.
