

Energy storage cabinet container in Auckland New Zealand

Why are battery energy storage systems important in New Zealand?

There is growth in renewable energy generation as New Zealand moves to a low carbon economy. But renewable energy like solar and wind are intermittent which means Battery Energy Storage Systems, which can be flicked on to supply power quickly, are important to manage winter peaks, and to make the national power grid resilient.

How many MW is a battery energy storage system?

It will have a total installed capacity of between 200-300MW. The BESS will connect to an existing 220 kV line via a new 33kV underground cabling into a new switching substation, and then into the Transpower substation, and onto the national grid. Why build a Battery Energy Storage System now?

Does thinAir provide wind & solar power in Dunedin?

In our Dunedin test site comparing wind and solar generation, ThinAir delivered 36% of the total power generated annually but 50% during the winter months from May to September. If you'd like to see how the PowerCrate wind and solar system can work for you, contact our team. PowerCrate is now available to order.
