

Georgia Export Outdoor Power

Is Georgia a wood pellet exporter?

Georgia is a leading wood pellet exporter. Major interstate highways and typically the world's busiest passenger airport helped make Georgia's transportation sector fifth in the nation in energy consumption in 2020. Petroleum products were the state's largest source of energy in 2020 (32%).

Which energy sources provide most of Georgia's electricity generation?

Coal and renewable resources provide almost all the rest of Georgia's electricity generation.

What percentage of Georgia's electricity is fueled by coal?

Coal-fired power plants fueled more than half of generation in Georgia before 2010, but coal's contribution declined with the retirement of two-fifths of the state's coal-fired generating capacity, almost 4,900 megawatts.²⁹ In 2021, coal fueled about 15% of Georgia's total in-state generation.

Does Georgia have wind power?

Georgia has no utility-scale wind-powered electricity generation.⁵⁶ The state has limited onshore wind energy potential, all of it in small areas on the mountain ridges along the state's northern border and in a narrow strip along the state's 100-mile Atlantic coastline.

How much natural gas is exported from Elba Island?

The Elba Island liquefied natural gas (LNG) import terminal has added liquefaction and export facilities with the capacity to export 350 million cubic feet per day. Export operations began in August 2020, and more than 84 billion cubic feet were exported from Elba in 2021.

Will Georgia's Vogtle nuclear power plant double its generating capacity in 2023?

Two new nuclear reactors under construction at Georgia's Vogtle nuclear power plant will almost double the plant's generating capacity and currently have planned startup dates in 2023. Natural gas accounted for 45% of Georgia's total electricity net generation in 2021.
