What is Solar Light? A solar lamp, solar light, or solar lantern has an LED light, solar panels, a battery, a charge controller, and maybe even an inverter. The lamp gets its power from a solar panel, which charges its batteries (solar photovoltaic panel). You can use solar power instead of candles or kerosene lamps to light your home.

Select Street Light Outage; Scroll down - from here you can either use the arrow button to find your current location or you can click the "search" bar and type in the address where the affected light is located; Zoom in to find the exact location of the light you want to report; Click on the light shown on the map; Click report this light
