Our in-house metalworking shop in Großkrotzenburg, Hesse, enables us to guarantee the highest quality standards and offer customised solutions for our customers.

Where are solar street lights made?

Our company specializes in the design and manufacture of solar street lights. We feature a state-of-the-art research and development center in Dresden, a sales and marketing office in Shenzhen, China, and a 10,000-square-meter manufacturing facility in Dongguan, China. 01. German Team

How to choose a solar street light?

Solar street lights require sufficient sunlight to fully charge the batteries. The location of the solar light should be chosen so that the PV module can be orientated towards the south and is illuminated by the sun for most of the day. As a rule, average solar radiation is sufficient to operate the lights at night.

Are solar street lights weatherproof?

Yes, all our solar street lights are designed for outdoor use and are fully weatherproof. They are protected against rain, snow and extreme temperatures and guarantee long-term use even under difficult conditions. How sustainable are solar street lights from Geo-Technik?

How long do solar street lights last?

The service life of our solar street lights varies depending on the model and operating conditions. Thanks to the use of modern battery management monitored LiFePo 4 batteries, the batteries have a service life of at least 8-10 years, which can be easily checked or replaced via the mast service door on most models.
