

Home power station generator

Is a portable power station a good alternative to a generator?

If you find yourself in need of power and away from a usable source, a portable power station is an inexpensive alternative to a generator. However, not all power stations are created equal.

What is the difference between a generator and a portable power station?

A portable power station is essentially a big rechargeable battery that you carry around. Deplete it, and it's useless until you can recharge. A generator, by definition, is a device that actually converts some type of energy to usable electricity in whatever circuitry you have it connected to.

How do I choose a portable power station?

Output is the other piece of the puzzle here. You'll want to consider what you need to run. If you simply top-up some phones and laptops, the smaller portable power stations that have just one or two AC outlets and a handful of USB-C and USB-A ports should be enough for you.

How do portable power stations work?

Portable power stations have control panels with LED displays and buttons that turn off and on inputs and display usage and remaining power. Most portable power stations are also compatible with Bluetooth and Wi-Fi, allowing you to monitor and control them remotely from a smartphone app.

What are the best portable power stations?

To help you decide, I tested the efficiency, in a variety of scenarios, of the best portable power stations from Jackery, Oupes, EcoFlow, Anker, Goal Zero, Greccell, Bluetti, Dakota Lithium, Lion Energy, Vtoman, and Ugreen. [What to Know Before Purchasing a Portable Power Station](#)

What is a portable power station?

Portable power stations are generally designed to power smaller electronic devices and appliances, from phones and table fans to heavy-duty work lights and CPAP machines. Pay attention to the estimated watt-hours each brand provides in its specs to determine which model makes the most sense for what you'd like to power.
