

# Home small solar power system 220v5000w

1.5kW Solar Power Kit. In recent years, when solar power systems were still expensive, the 1.5kw solar power system was the smallest affordable system that you could get installed by professionals. The 1.5kw solar system is not advertised as much as the bigger systems as it won't have a big enough impact on your electricity bills.

The system also provides enough energy to charge several small power tools, run our home sound system and, amazingly, power a full-size chest refrigerator year round. The cost of this complete solar system, in today's pricing for the components, was about \$1200. Our simple home solar power system is comprised of four basic components: the ...
