

Containerised generators offer increased levels of weather protection for the generator unit in harsh environments. For example they're ideal for exposed locations, marine environment, oil and gas applications. As they're enclosed in a secure container that is usually a clean environment they often require less maintenance.

India's container throughput grew by 11.4% in 2018. All Indian ports registered positive growth during the year except one or two unfortunate ones. Overall, India's container traffic in last four years has grown significantly with a CAGR of close to 12%.
