A Mitsubishi elevator IGBT module is a crucial component within the elevator's drive system. IGBT stands for Insulated-Gate Bipolar Transistor, a powerful semiconductor device that efficiently controls the flow of high voltage and current. Function: The IGBT module acts as a switch that regulates the power delivered to the elevator motor.

PM150RSE120 Description Mitsubishi Power Transistor Module Summary of Features. PM150RSE120 is a(n) 1200V, 150A Power Transistor Modules. . Target Applications . PM150RSE120 and other IGBT (Insulated Gate Bipolar Transistor) transistor modules find applications in various industries and systems where high power switching is required.
