Solar energy and wind power supply are renewable, decentralised and intermittent electrical power supply methods that require energy storage. Integrating this renewable energy supply to the electrical power grid may reduce the demand for centralised production, making renewable energy systems more easily available to remote regions.

Over the past two years, we've tested 62 different outdoor lights (you read that right) including solar pathway, smart, spotlights, lanterns, wall-mounted, and string lights. We became solar light experts, if we do say so ourselves. We put outdoor solar lights to the test in The Lab, where we simulated hail storms and filmed the lights overnight to see if they truly stayed on ...
