**What Is an Uninterruptible Power Supply?** An uninterruptible power supply (UPS) is essentially a backup battery for mission-critical electronics. They come in various sizes and configurations, but all serve the same two primary purposes. Provide backup power in ...

A sophisticated UPS power supply may offer AVR, or automatic voltage regulation. This feature stabilizes incoming AC power so that it is always delivered at 120 volts, without requiring the backup battery to come online. This is useful for preventing a UPS from repeatedly switching between AC and battery power during frequent brownouts.
