Designed with your current and future needs in mind, Socomec's pioneering technologies guarantee the best possible reliability and highest levels of UPS availability for your electrical power supply.

Online uninterruptible power supplies use a combination of rectifier and inverter to supply power to the AC load in normal operation. During a power failure, power is supplied with the support of an inverter. Conversely, an offline system supplies power from the AC mains to the load. An online system's output power supply stays on.

Lilongwe UPS Uninterruptible Power Supply
