On top of this, Hamburg also has its own plan to quit sourcing fossil fuels and nuclear energy for the sake of climate protection. By 2050, Hamburg plans to cut carbon emissions by more than 80 percent. Solar power is a crucial driving factor in both Hamburg and all of Germany to reach these renewable energy transition goals.

Folding photovoltaic panel containers are designed to be highly flexible. Photovoltaic panels can be folded and stored inside the container, taking up very little space during transportation and storage. Once you arrive at your destination, the photovoltaic panels can be unfolded and start generating electricity quickly with a simple operation.
