

# Mobile power bank is small and portable

What is a portable charger & power bank?

Portable chargers and power banks are the best ways to keep your devices running no matter where you are. They're lightweight, small, and can easily fit into your pocket or purse. However, there's some confusion on what is a powerbank and how it differs from portable chargers.

What is a power bank?

A power bank is the same as a portable charger, both designed to charge devices like smartphones and tablets on the go. These compact and rechargeable battery packs are essential for travel or emergencies, providing a convenient solution to keep your devices powered without relying on a wall outlet.

How many portable power bank Chargers have been tested?

To date, we've tested more than 100 portable power bank chargers. The most popular and relevant models are shown on this page. Our rigorous testing programme involves:

Should I buy a small power bank or a large power bank?

Small power banks can be great for an occasional top up of power on the go - they're light enough that you'll hardly feel the weight of them in your bag. Large models give you more juice but are less portable.

How many times can a power bank charge a phone?

If you want to charge your phone twice or thrice, then a portable phone charger with 10000 mAh will work fine and fit in your pocket. But if you're planning on charging your phone more than three times, then a 20000mAh is the way to go. Are all power banks portable? Not all, but most. The main thing that makes a power bank "portable" is its size.

What is a good mAh rating for a power bank to charge a phone?

A small 3,000 mAh battery is great for charging phones. Check the power bank's mAh (milliamp hours), and compare it to what your device requires. The idea behind the portable charger is that it should be, you know, portable.
