A 120-kW electric vehicle DC charger with two charging guns. New energy electric vehicles will become a rational choice to realize the replacement of clean energy in the field of transportation; the advantages of new energy electric vehicles depend on the batteries with high energy storage density and the efficient charging technology.

Myanmar's power sector has been severely affected by the ongoing political turmoil. The power sector has been spiralling downward since 2021 with prolonged electricity blackouts throughout the country. Electricity generation has been declining, resulting in a widening power supply-demand gap.

Myanmar's energy storage systems, specifically lithium batteries, represent a significant opportunity for the country's development. 1. The demand for renewable energy solutions is increasing, 2. The need for reliable energy storage is critical for infrastructure improvement, 3.
