Choosing the right Uninterruptible Power Supply (UPS) is crucial for UK households to protect against power outages and surges. With my deep expertise in technology and electrical systems, I've carefully tested a range of UPS devices, focusing on power capacity, battery runtime, and efficiency.

What To Look for When Choosing a UPS Power Supply. Here's a summary of the essential factors when shopping for an uninterruptible power supply solution for your home. Automatic Switchover Time. Desktop computers, external hard drives, and other information storage devices demand a data-center level auto-switchover time of >10ms.

An UPS (Uninterruptible Power Supply) is a backup power device that allows the Synology NAS to continue operating for a short time if power failure occurs. This function located at Control Panel > Hardware & Power > UPS helps prevent data loss by giving the Synology NAS enough time to save data and unmount volumes before losing power and ...

An uninterruptible power source (UPS) is an electrical equipment that provides emergency power supply to a electric load when the input power source or mains power fails. A UPS differs from an auxiliary or emergency power system or ...

The main reason for having a UPS is to protect against data loss due to power outages whether it be unsaved work, or corruption due to the computer not having enough time to write things to disk. I only really started to take this seriously when I got my Synology networked attached storage (NAS) which holds all my data. The UPS I chose is an APC model with ...

A UPS is an uninterruptable power supply and in its simplest form, it ensures that during power outages or power blips (temporary interruptions of power), your NAS won't improperly shut down. Overall, any UPS device that your Synology NAS is receiving power through will work.

Losing power from the national grid can wreak havoc on your network-attached storage (NAS) if it shuts
