

New outdoor power supply in Porto Portugal

What is EW Portugal - wave energy solutions - Unipessoal Lda?

Eco Wave Power (EWP) has established EW Portugal - Wave Energy Solutions, Unipessoal Lda, a wholly owned subsidiary in Porto, Portugal. This move should enable EWP to commence official licensing procedures for its planned 20MW wave energy project in Portugal. This is part of the company's concession deal with the Port Authority of Leixões, APDL.

What is the electricity supply in Portugal?

Similar to other European countries, the electricity supply in Portugal is around 220 volts AC with a frequency of 50 hertz. You may come across some areas which still have the old 110-volt supply, although this is not very common. Be aware that a 220-volt current is significantly higher than in some non-European countries.

How many GW of wave power will Portugal have?

Portugal estimates that there is a potential to install 3-4GW of wave power capacity in the country alone. It also believes that ocean renewable energies have the potential to supply 25 per cent of its annual power consumption. In addition, the sector could generate EUR254 million in investment, as well as 1,500 new jobs.

2. Porto Belo Market. The Porto Belo Market in Porto gets its name from the world-famous Portobello Road market in London and sits on the beautiful Praça de Carlos Alberto. It might be the breathtaking tiles that entice you to this market, but it's the enchanting goods for sale that keep you coming back.

So electrical appliances from the UK will function in Portugal with the use of an adapter but a transformer would be necessary for appliances from countries such as Japan and the USA. Europlug Most laptop computers are automatically multivoltage but would need an adapter if from countries using a different type of plug.
