What Is a Solar Inverter? A solar inverter, also known as a PV inverter, is a type of electrical converter that converts the variable direct current (DC) output of a photovoltaic (PV) solar panel into a utility frequency alternating current (AC) that can be fed into a commercial electrical grid or used by a local, off-grid electrical network. Basically, a solar inverter is a ...

Note: As follows will focus strictly on residential and small commercial grid connection systems. If you work on a DIY off-grid system, you need to use a different inverter to build for off-grid purposes. There are two basic inverters for solar systems, string inverters and microinverters. String inverter
