How does a solar inverter work?

The solar inverter converts the direct current (DC) generated by the solar panels into alternating current (AC). The solar controller regulates the charging and discharging of batteries, optimizing the performance and lifespan of the solar energy system.

What do I need to install a solar system?

The Complete Off-Grid Solar Kit EG4 6000XP includes just about everything you will need for installation. However, you will need your own installation tools and grounding rods/wire, as well as optional components like surge limiters, and breaker panel/s. We also strongly recommend getting a certified solar installer and/or master electrician for professional installation.
