

Outdoor Power Supply Performance Comparison

What are the best portable power stations?

To help you decide, I tested the efficiency, in a variety of scenarios, of the best portable power stations from Jackery, Oupes, EcoFlow, Anker, Goal Zero, Greccell, Bluetti, Dakota Lithium, Lion Energy, Vtoman, and Ugreen. [What to Know Before Purchasing a Portable Power Station](#)

What is the best portable power supply for camping?

The EcoFlow River is the best portable power supply for camping. It's rugged, efficient, and smarter than bulky, fuel-powered generators. With a built-in handle and the ability to be charged via car port, wall outlet, or solar power, the River is easy to transport and perfect for outdoor use.

What spec should you consider when buying a power station?

Whatever the reason you are purchasing a power station, the most important spec to pay attention to is watt hours, which is a measurement of how much energy the power station can hold. While a particular power station might claim to hold 1,000 watt hours, the actual amount of usable power you can get out of it is a different story.

How much power can a portable power station hold?

While a particular power station might claim to hold 1,000 watt hours, the actual amount of usable power you can get out of it is a different story. The best portable power stations also have an onboard computer that shows you how much energy is left in your unit, as well as how much power it's currently using.

Are portable power stations worth it?

Portable power stations are more powerful and cost effective than ever before. And, thanks to advances in lithium-ion battery technology, they're also lighter and more compact. Whether you've been dreaming of van life or are building out your emergency kit in advance of that next blackout, there is a power station that will meet your needs.

Do you need more than one power station?

The reality is that if you're going to need to plug in more laptops or phones into a power station than there are ports for, odds are you are going to need more than one power station (or a single unit that is outside the scope of "portable").
