How much power can a portable power station hold?

While a particular power station might claim to hold 1,000 watt hours, the actual amount of usable power you can get out of it is a different story. The best portable power stations also have an onboard computer that shows you how much energy is left in your unit, as well as how much power it's currently using.

What are the best portable power stations?

To help you decide, I tested the efficiency, in a variety of scenarios, of the best portable power stations from Jackery, Oupes, EcoFlow, Anker, Goal Zero, Greccell, Bluetti, Dakota Lithium, Lion Energy, Vtoman, and Ugreen. [What to Know Before Purchasing a Portable Power Station](#)

What spec should you consider when buying a power station?

Whatever the reason you are purchasing a power station, the most important spec to pay attention to is watt hours, which is a measurement of how much energy the power station can hold. While a particular power station might claim to hold 1,000 watt hours, the actual amount of usable power you can get out of it is a different story.

Do portable power stations leak energy?

Portable power stations leak energy over time. If you plan to use your power station primarily for overlanding or camping this is not an important issue: just top it off before you head out the door. However, if you plan to power up your power station and then stash it in the garage until you need it, then this is a more important issue.

How much power do you need for camping?

The answer to this depends largely on what you intended to do with it. If all you want is backup power for your family's phones while camping over the weekend, you can get away with something relatively small -- 200 watt hours would be more than enough.

How much power does a 50 watt power station use?

At 50 watts, it's about three times what other power stations are using. I was also surprised in my high wattage test that the unit stopped supplying power to the AC port with 4 percent still left in the tank.
