What is the main business of a battery pack assembly company?

The main business is to provide solutions for the lithium battery pack assembly production line, include: battery insulation paper sticking machine, battery cell sorting machine, battery spot welding machine, battery test equipment, battery PCM tester, battery BSM tester...

What is a battery pack?

A battery pack is a group of cells packaged into one unit, typically to achieve higher power and/or current loads. In most cases, batteries are first assembled into 'modules' with a fixed number of cells, and then the modules are assembled into packs.

What are portable battery packs?

Portable battery packs are external batteries that you charge and use in emergencies by plugging in your gadget in the accessory's USB port. They come in many shapes and sizes, but if you demand having the largest one possible, look no further than the list below.

How does a battery pack assembly work?

The battery modules are then delivered to ASRSs (automated storage and retrieval systems), which we can also develop if needed. JR Automation's battery pack assembly solutions include all the vital steps: pulling modules from ASRSs, inserting them into the pack, installing covers with sealing, leak testing, and more as needed.

What can a battery manufacturing company do for You?

Offer turnkey solutions. From battery cell test and load to module assembly to battery pack enclosure welding and assembly. Design for Automation (DFA). Scale your manufacturing from semi-automated manual assembly to fully automated solutions as your business grows. Lead with effective communication and project management.
