

# Palestine Large Capacity Outdoor Power Supply EK

Is the energy sector in Palestine a unique situation?

The energy sector, specifically electricity in the State of Palestine, is in a unique situation.

What are the energy sources in the Occupied Palestinian territories?

1Note prepared by the EuroMed and Middle East Unit for information only purposes for the DPAL meeting of 26-5-20152In the occupied Palestinian territories (oPt), energy sources consist of (i) the energy generated by petroleum and natural gas derivatives; (ii) electricity; and (iii) renewable energy.

What is the Palestinian energy strategy?

Accordingly, the Palestinian Energy Strategy is to generate 50% of power locally from gas-fired power plants, import 40% from neighboring countries, and generate 10% from renewable energy sources. By 2026, the plan states that 200 MW of electricity will be generated from solar energy (utility-scale solar PV farms and rooftop solar PV panels).

How much electricity does the Palestinians use?

The Palestinian territories are highly dependent on electricity provided by the IEC, around 88% of total consumption.<sup>4</sup> The Palestinian energy market has limited options to develop indigenous sources of electricity and Israeli restrictions have prevented the construction of power networks in large parts of Area C which comprises 60% of the West Bank.

What is the Palestinian energy security plan?

It lays out a vision of improved energy security in the Palestinian territories based on expanding and diversifying power supply and provides a sequenced road map of actions to improve the current situation of the energy sector so it can meet the requirements of the development of the related sectors.

Where does Palestinian electricity come from?

Palestinians are heavily dependent on imported electricity from the Israeli networks: 87 percent of electricity consumed is secured from Israel and around 4 percent from Egypt and Jordan. The remaining 9 percent is produced locally in Gaza and used to fuel the region's power plant on a continuous basis.
