

Photovoltaic glass price increased for the third time

What are PV solar cell glass price developments?

This post is a summary of the PV solar cell glass price developments. The price developments of PV solar cell glass are expressed in US\$ prices converted FX rates applicable at the time when the price was valid. PV solar cell glass price index developments are calculated from multiple separate sources of data to ensure statistical accuracy.

What happened to solar glass prices in CW2?

All module products maintained their prices in CW2. Solar glass varieties maintained their prices WoW in CW2, after seeing a sharp drop in the last week of CY2024. The 2 weeks of CY2025 have been largely positive for the TaiyangNews PV Price Index, with 8 of the listed products seeing price upticks so far.

How did the taiyangnews PV price index perform in 2025?

The TaiyangNews PV Price Index recorded an upward movement in prices for some upstream products in Calendar Week 2 of 2025. n-type silicon was up 3.7% from CW1, just 3 weeks after registering an increase in CW51/2024. Having remained unchanged since CW36/2024, granular silicon prices were also up 5.4% WoW.

How does glass demand affect inventory?

The increase in demand drives the increase in glass demand, and inventory gradually declines, expected to drop from about 4 weeks at the end of February to around 20 days by the end of March. Material Prices Decline, Inventory Reduction Expected to Increase Price.

How many tons of glass are there in 2021?

The glass capacity in 2021, 2022, and 2023 was 46,000, 81,000, and 105,000 tons, with a year-on-year increase of 35+%, 70+%, and 30+%. As of now, the domestic glass capacity is about 99,000 tons, plus 5,850 tons overseas. In Q1 2024, the industry added 3,100 tons of new capacity and 650 tons of resumption.

How has cy2025 impacted the PV price index?

The 2 weeks of CY2025 have been largely positive for the TaiyangNews PV Price Index, with 8 of the listed products seeing price upticks so far. While n-type wafer and cell prices have increased, 3 PERC module types have experienced declines. The data refers to average product prices in China.

JinkoSolar said its global PV shipments increased 19.2% year on year to 99.6 GW in 2024, but a steep drop in module prices drove down revenue 22% to CNY 92.2 billion. Net profit plunged 98% to \$7. ...

While module prices are seeing less increase, the rapidly growing market share of glass-glass modules contributes to a shortage of PV glass. Moreover, with prices for the raw materials for PV glass going up, the price for 2-mm glass has increased to RMB 24/m² this month whereas that for 3.2-mm glass has risen by 15%.

Photovoltaic glass price increased for the third time

from RMB 26/m² in August to ...

PV Glass Prices are Expected to Increase in the Second Half of This Year and Witness an Upward Inflection Point in Both Short and Long Cycles published: 2023-07-25 17:40 Edit Research indicates that module production capacity reached 40.3GW in June, showing a year-on-year growth of 52.9% but a decline month-on-month due to early-stage inventory ...

"There has been a slight increase in prices," a representative from Trina Solar told Yicai, adding that prices per watt are now 2 to 3 Chinese cents (0.3 to 0.4 US cents) higher in China and Europe. No details were unveiled about the US market.

The mainstream price of photovoltaic glass 3.2mm coating market is 28.5RMB/m², and the mainstream price of photovoltaic glass 2.0mm coating market is 21.2RMB/m². ... has risen this year, which has led to an increase in the price of photovoltaic glass. Increasing demand for photovoltaic glass. The development of photovoltaic industry causes ...

Solar glass varieties maintained their prices WoW in CW2, after seeing a sharp drop in the last week of CY2024. The 2 weeks of CY2025 have been largely positive for the TaiyangNews PV Price Index, with 8 of the listed ...

The TaiyangNews PV Price Index recorded an upward movement in prices for some upstream products in Calendar Week 2 of 2025. n-type silicon was up 3.7% from CW1, ... Solar glass varieties maintained their prices WoW in CW2, after seeing a sharp drop in the last week of CY2024. ... While n-type wafer and cell prices have increased, 3 PERC module ...

The price of 3.2 mm single-layer coated glass has increased from RMB 21, and it is expected to return to previous levels. The main reason for the glass price increase is previous maintenance and large orders from module manufacturers. As for encapsulation films, EVA prices have risen over the past month, affecting costs by about RMB 0.3.

The average price of 2.0 mm solar glass increased CNY1 to CNY 13.5 per square meter, up 8% from last week. Meanwhile, 3.2 mm solar glass climbed CNY 2 to CNY 22.5 per square meter, a 9.8% rise. Xinyi Solar has reported CNY 21.92 billion of full-year revenue for 2024, down 9% year on year.

The global solar photovoltaic glass market size is projected to hit around USD 196.89 billion by 2034 from USD 13.03 billion in 2024 with a CAGR of 31.20%. ... notably in the areas of Asia-Pacific, North America, and Europe. Due to increased penetration from undeveloped markets, the residential application category is growing. In this ...

Prices for cells and PV glass, both of which remain high in Q4, are rising every month, and exchange rates are

Photovoltaic glass price increased for the third time

varying wildly. ... As the module sector is having a hard time, cell prices are thus struggling to climb. So, this week's price for M6 cells sat at RMB 0.93-0.935/W. ... the customers can hardly accept any increase in module prices ...

Glass and Its Products (PPI) Price Trend for the Second Half of 2023. Asia. In the later stages of the third quarter, the prices of glass and its products rose due to strong industry production and sales. The downstream industries expressed bullish sentiments, leading to increased glass prices across Asian countries, with notable decreases in ...

Different from BIPV solar glass, the Solar glass used in solar station, are usually 2.0 or 3.2mm low iron patterned tempered glass which uneven surface which can decrease the light reflectance and increase the solar panel production efficiency.. Solar glass price trend -2019-2021. In the past two years, the price of photovoltaic solar glass has fluctuated sharply.

Last week, the price of 2mm photovoltaic coated glass was 21.92 yuan/square meter, up 3.64% from the week before the festival; the price of 3.2mm photovoltaic coated glass was 28.5 yuan/square meter, up 3.64% from ...

An industry insider revealed that the price of photovoltaic glass is affected by the general rise in the price of the photovoltaic industry chain, in addition, the downstream installation market demand increased, domestic soda prices, the size of photovoltaic modules on the market is not uniform, and the July and August floods caused by some ...

The Chinese PV market saw PV module prices increase by up to 15% in the last few weeks, according to Dany Qian, the vice president of China-based solar module manufacturer JinkoSolar. "The ...

On September 8, PV InfoLink, a third-party industry consulting agency, released the latest week of PV supply chain price data, showing that the average price of 3.2 mm PV glass was 26 yuan per ...

The price developments of PV solar cell glass are expressed in US\$ prices converted FX rates applicable at the time when the price was valid. PV solar cell glass price index developments are calculated from multiple separate sources of data to ensure statistical accuracy. The outlook for PV solar cell glass prices, on the second tab, is ...
