Do inverter refrigerators save electricity?

Needless to say, it will have a big impact on your monthly electricity bill. This is why home appliance manufacturers innovated the inverter technology into refrigerators. While inverter refrigerators do save you electricity, they are usually priced around PHP2,000 - PHP4,000 higher compared to non-inverter models.

How much power does a refrigerator inverter use?

For the inverter to reliably run the refrigerator and these additional appliances, it must have a Surge Power rating greater than 1590 Watts: Potential Surge Wattage (Watts) = 1440 Watts (refrigerator) + 40 Watts (lights) + 60 Watts (laptop charger) + 50 Watts (TV)

Which inverter is best for a fridge?

Assuming the running wattage of this fridge is less than 500W (which is surely the case), an inverter such as the BESTEK 500W Power Inverter would be a perfect match. It's rated at 500 Watts and has a 1000W peak power capacity, and it's a Pure Sine Wave inverter.

Should you buy an inverter refrigerator or a non-inverter?

While they cost more upfront than non-inverters, the energy savings and a longer-lasting motor of the inverter refrigerator will pay you back in dividends as the years go by. Aside from that, the added benefits of durability, silent operation and better temperature control is just too good to pass up.

What size inverter refrigerator do I Need?

Large families (6+ people): 10 cu. ft. or larger (280+ liters) is perfect for those needing ample storage for large quantities of food, drinks, and leftovers, making it suitable for bigger households or frequent hosting.
