

S series uninterruptible power supply price

What is an uninterruptible power supply (UPS)?

An uninterruptible power supply (UPS), with a 1kVA/600W capacity and line interactive design, provides battery backup for computers, servers, and office networks. It has a 220V/120V AC output voltage and is brand new, high quality, and inexpensive.

How does the s3k series uninterruptible power supply work?

The S3K Series uninterruptible power supply protects against most severe power disturbances including over/under voltages through state of art, line-interactive technology- most power disturbance corrections are accomplished without transferring to the internal battery.

How long does an uninterruptible power supply run?

Given that the load demand is 270W, which is less than the UPS's 300W power rating, we can calculate the UPS runtime. First, we find the load's amperage: $270W / 12V = 22.5A$. Then, using the UPS's battery capacity of 2.9AH, the runtime is 0.13hrs or 7 minutes 44 seconds.

Does the s3k series ups have a battery life?

Utility power is continually protected by the S3K Series UPS's and internal battery life is optimized. The uninterruptible power supply has built in protection for under and over voltage conditions including low-energy lightning surges introduced on the input power source.

What is a s3k uninterruptible power supply mini-tower?

The S3K uninterruptible power supply mini-tower is an economical choice for those applications requiring the performance of a sinewave output, line interactive UPS with the mini-tower shape for cabinet installations.

What is a battery test on a s3k series ups?

The S3K Series UPS's are provided with a battery test function to insure the capability of the battery to supply power in emergency situations. Should the battery fail this test, the uninterruptible power supply will display a warning to indicate that the battery needs to be replaced.
