Supercapacitors come with some disadvantages as well. One disadvantage is a relatively low specific energy. The specific energy is a measure of total amount of energy stored in the device divided by its weight. While Li-ion batteries commonly used in cell phones have a specific energy of 100-200 Wh/kg, supercapacitors may only store typically 5 ...

A battery price of EUR 500/kWh and a supercapacitor price of EUR 10,000/kWh are assumed. Improvement of the power factor correction in machine tools But today the high energy costs and the decrease of supercapacitor prices allow to raise the efficiency of machine tools, on condition that the supercapacitors are optimally dimensioned [10].

Actually, the real challenge to the supercapacitor market growth is the high price of these devices [4, 18] nsidering that about 50% of the total cost of commercial SCs corresponds to the electrode and 60-70% of this amount accounts for the active material [19], the expensive advanced materials cannot be borne by the tight economic margins spite of their ...
