The electro-chemical battery energy storage project uses lithium-ion as its storage technology. The project was commissioned in 2017. The AES Dominicana Andres - Battery Energy Storage System was developed by Fundacion AES Dominicana. The project is owned by The AES (100%).

How will the SCC-800 2x1 floating power plant benefit the Dominican Republic?

We're excited that in the end, the SCC-800 2x1 floating power plant will bring clean and green electrical energy solutions to benefit more people in the Dominican Republic," said Ng Sing Chan, President, Marine, ST Engineering. Seaboard Estrella del Mar III will be installed at the customer's location in the country's capital city Santo Domingo.

The right energy storage cabinet can make a significant difference in ensuring operational efficiency, safety, and long-term cost savings. For businesses in industries like renewable energy, manufacturing, and telecommunications, selecting the ideal cabinet is more than just a technical choice--it's a strategic investment.

Estrella del Mar III offers a host of benefits to the people of lively Santo Domingo, with a more reliable energy supply, reduced LCoE (levelized cost of electricity), and less noise--residential housing is close to the power plant.
