A sine wave inverter converts direct current (DC) from sources like batteries, diesel generators or solar panels into alternating current (AC). Sine refers to the wave-like form of AC. All our inverters produce a current wave nearly identical to that of the regular electricity grid. That's why we also call these types of inverters

pure sine ...

Clean and reliable is all you need in power, its what comes from the Grid. In fact a good true sine wave inverter can often produce cleaner power than the Grid. Another item to consider on power inverters is stated quality and information. I have recently seen inverters in stores that have advised they were selling the highest quality inverters.
