

Should I buy original or assembled tool batteries

Why should you use original manufacturer power tools batteries?

While communication plays a huge role in why you use original manufacturer power tools batteries, there are other elements. Not all lithium-ion cells are created equal. Original batteries from Power Tool Institute member manufacturers use cells with proven designs, strict quality control, and longer lasting capacity.

Do Makita Tools need a battery?

When it comes to powering your Makita tools, the type of battery you use can considerably impact their performance and lifetime. With the market swamped with counterfeit items, distinguishing between genuine and non-genuine Makita batteries is critical to ensuring the safety of your tools and you.

Should you buy a cheaper battery?

Whether you're talking about a tool failure, a failure that leads to property damage, physical injury, or just shorter battery life and capacity, the money you save buying a cheaper battery may result in a much more expensive experience over time. Want more? Join our newsletter and get the latest tool reviews every week!

Do rebuild shops use high capacity batteries?

One of the claims that some rebuild shops make is that they use high capacity cells (2400mAh) which will give longer run times compared with OEM batteries. Also, since my tools are older, replacements are a bit harder to find. The cost difference doesn't seem that significant (rebuilding seems a bit cheaper).

Does Tool Den sell Makita batteries?

Tool Den is an authorised Makita dealer, and we sell a wide range of Makita batteries and chargers. Explore our best sellers below: What should I do if I suspect I have a counterfeit Makita battery? If you suspect you have a counterfeit Makita battery, stop using it immediately and contact Makita's customer support for assistance.

Should I buy a cordless power tool?

Please don't buy a power tool just because it's blue and orange. That's just dye in the tool plastic and it won't do anything for the performance and durability. Cordless tools are incredibly convenient and make many projects easier. You don't need everything to be cordless, though.

You need to purchase a battery, a charger, a case and the tool each time. MacAllister power tools which are sold by B&Q are identical. They are sold as bare kits and thus are considerably cheaper. By as much as 40%. So if you are already invested in a number of Titan batteries, which I am, it makes sense to purchase MacAllister bare tools.

WeDoBatteries uses the latest in fusion welding technology, new cells and 100% nickel tabs to build cordless battery packs that are as good as and usually better than the original OEM batteries. The newly assembled,

Should I buy original or assembled tool batteries

completely tested and balanced battery pack will then be sent direct to your door or place of business usually via FedEx.
