

# Solar lights for home use multifunctional

Which solar lights are best for your outdoor space?

Luckily, we tried and tested a wide range of solar lights to find the best one for every outdoor space and how well they cope with different weather conditions for longevity. If you're after string lights, Brightech's Ambience Pro LED Outdoor String Lights is our favorite pick.

How many solar-powered outdoor lights are there?

Over the last few years, we've tested 62 different outdoor lights, including over 30 solar-powered options. After testing in our lab or at one of our own homes across the country, each light was evaluated on ease of assembly, brightness, features, design, value, and durability.

What are the different types of outdoor solar lights?

Based on their light output, outdoor solar lights fall into three general types: motion-activated, dusk-to-dawn, and timer-controlled. Because of solar cell size and battery capacity, the solar energy gathered is a limited resource, so consider when you want the lights to shine and for how long.

What are the best solar lights?

We chose the AloftSun Solar Motion Sensor Outdoor Lights as the overall best solar lights for their durability, water resistance, and motion-sensing capabilities. If you're looking for a set of string lights, we loved the Brightech Ambience Pro Solar Powered Outdoor String Lights, because they held up to water and freezing temperatures.

What are the best solar landscape spotlights for outdoor spaces?

Our top pick for most outdoor spaces is the AloftSun Motion Sensor Solar Landscape Spotlights. During testing, they withstood our durability tests, were easy to use, and were bright enough to read under! These spotlights can detect motion from as much as 33 feet away, depending on the setting.

How much sunlight does a solar panel need?

Generally, eight-10 hours of direct sunlight per day, will produce around 15 hours of illumination. But this will depend on location, type of light and exposure it gets. It's best to place your lights in an area that isn't shaded by trees, walls or even certain roofs, as these can obstruct the amount of light the solar panels receive.
