

What is a fire proof storage container?

Our fire proof storage containers are fully tested and certified as REI 120 in accordance with the current European standard EN 13501-2 and allow you to store flammable substances close to buildings or directly on the production floor.

Are efectis fireproof containers certified?

For more than 40 years, the accredited Efectis laboratory has been a recognised body for the testing and certification of fireproof products. The official, certified REI 120 report classifies our fireproof containers to also be approved in other countries where the same regulations apply.

What happens if a DENIOS fire resistant container is not certified?

In the event of a fire, the system must maintain its basic parameters: If the fire resistance of the system as a whole is not certified, it is considered to be level 0 (zero), even if the individual components (e.g. walls, roof are separately certified). DENIOS fire resistant containers are always tested as a whole.

Which countries certify NIOS fire resistant solutions?

In countries such as Italy, Spain and France, where REI 120 certification is required, DENIOS fire resistant solutions meet the regulations. Other international institutions certify fire resistance according to the regulations of various countries, which may be less stringent, such as Germany or Austria.

Do NIOS fireproof containers pass efectis fire tests?

DENIOS fireproof containers have passed Efectis fire tests in accordance with EN 13501-2. For more than 40 years, the accredited Efectis laboratory has been a recognised body for the testing and certification of fireproof products.
