

St George Solar Fan

What is the Solar Star Ventilation Fan IM 1500?

The Solar Star Ventilation Fan IM 1500 is a solar-powered attic fan designed to mount inside your attic. With a 16-watt solar panel, it creates efficient airflow to vent heat and moisture. It converts passive gable, dormer, powered, and whirlybird vents into an active, solar-powered venting system.

Are solar-powered attic fans a good idea?

Solar-powered attic fans are a good idea as they cool your attic and help maintain a cool home. In addition to the benefits of our solar-powered attic fans, homeowners who install Solatube's powered Whole House Fans also benefit from having their attics cooled.

What are the best solar gable attic fans?

While certain attic fans can be paired with a supplementary thermostat, the simpler route is to select one that comes with a prewired thermostat. This holds for the highly regarded gable mount model offered by Maxx Air. It is thus among the best solar gable attic fans.

Can a solar star ventilation fan be installed on all attic fans?

Yes, a Solar Star Ventilation Fan can be installed on all attic fan models.

What is the largest attic fan offered by Solatube?

The RM 2400 is our biggest attic fan ever, featuring an industry-leading 35-watt solar panel for maximum ventilation.

How do roof-mounted solar attic fans work?

Roof-mounted solar attic fans are known for their efficiency and robust performance, but they require a more intricate installation process. This involves creating a vent hole in your roof, installing the fan, and securely sealing the opening. As a result, the installation procedure can be time-consuming.

At SOLARZING, we are proud to help residential and commercial clients embrace this change. We are a solar installation company that offers solar panel systems, solar battery storage, EV charger system installations, and more. Our St. George solar energy company was founded in response to the rising cost of energy and solar system installations.
