

Standard PV Module Prices in Pristina

Which companies currently dominate the PV module market?

Trina Solar and Yingli currently dominate the PV module market. Module prices: A weak Q4 has once again led to a drop in module prices in Europe. It is time to free up international trade in PV products again so that reduced costs and required price reductions can finally be passed on to the market.

How did PV module price development in February?

PV module price development according to PV Index of Sunstore. Average trading PV module prices were at 0.124 EUR/W across Europe in February both for bifacial and monofacial modules. PV PMI (Purchasing Managers' Index) score increased from 68 in January to 73 in February, underlining strong demand.

What is the price trend for polycrystalline modules?

We are already seeing rises of 0.5 to 1.5 euro cents per watt for polycrystalline modules. While monocrystalline modules (high-efficiency and all-black) are still broadly stable on the spot market, the price trend for polycrystalline modules is increasing.

Are solar modules still priced above EUR0.60?

The prices for solar modules available on the market, such as those from SolarWorld or Sonnenstromfabrik, are still trading above the EUR0.60 mark. Other companies are constantly working to optimize the performance and efficiency of their modules.

Are photovoltaic modules going up in Europe?

In Europe, the price increase for photovoltaic modules is not quite as strong as expected, at least until now. In particular, thin film module prices remained relatively stable, with March showing barely any movement.

What happens to the market for existing PV installations?

Of course jobs are also saved as a result because the market for existing PV installations will not become smaller in the foreseeable future, even if construction of new installations should remain in a state of decline. Module prices: The minimum price regulation paralyzes the European photovoltaic market.
