

What is Tashkent Scientific Research Institute of Chemical Technology?

TSRICT was established on the basis of one of the departments of the Institute of Mechanics of the Academy of Sciences of Uzbekistan. In January, 1992 was transformed into an independent research institute, with legal personality, and he was given the new name of the Tashkent Scientific Research Institute of Chemical Technology.

Where is the PV plant located in Tashkent?

No constraints have been identified along the international transit corridor. The PV plant site is located along the 4R-12 district highway, which links feeder roads within the districts of Yukorichirchik, Parkent and Kibray to the ring road along the outskirts of Tashkent City. The single carriageway is paved and in good condition.

Where is Bess project located in Tashkent?

The PV plant and the BESS facility are situated 3.5 km apart, within Yuqorichirchik District and Parkent District respectively. Both districts are located within Tashkent Region. The overall project location lies about 20 km from Tashkent City.

Who is the O&M contractor in Uzbekistan?

NOMAC Maintenance Energy Services is the main O&M Contractor appointed for O&M support under the Project Company. The Government of Uzbekistan commissioned the solar resource assessment in March 2023, and the study was undertaken by The Project Developer.

What are button cell supercapacitors?

Building upon the foundation of button cell supercapacitors, these capacitors have undergone changes in packaging and materials to withstand reflow soldering peaks of up to 260°C for less than 5 seconds. They offer a wide operating temperature range from -40°C to +85°C and a voltage tolerance range from 3.6V to 5.5V.

What is the operating temperature of a supercapacitor?

Operating temperature range from -40°C to +85°C and a voltage tolerance range from 3.6V to 6.3V. These supercapacitors boast an energy density that is 8 to 10 times higher than that of EDLC (Electrochemical Double Layer Capacitors). They can withstand voltages of up to 4.2V.

Sanctions target individuals and entities in 17 jurisdictions; Deputy Secretary calls on countries to take similar action against enablers of Russia's military-industrial base
WASHINGTON -- Today, the U.S. Department of the Treasury sanctioned 275 individuals and entities involved in supplying Russia with advanced technology and equipment that it ...

Sci-Hub is the most controversial project in today science. The goal of Sci-Hub is to provide free and unrestricted access to all scientific knowledge ever published in journal or book form.. Today the circulation of knowledge in science is restricted by high prices. Many students and researchers cannot afford academic journals and books that are locked behind paywalls.

Supercapacitors can provide high power at a short period of time. Correspondingly, supercapacitors are postulated to be the potential replacement for batteries due to their excellent power density which reduces the charging period, longer cycle life than batteries, forgiving even it is overused and is environmentally friendly compared to batteries.
